

The Australian Access Federation (AAF) is the national service provider of access and authentication for the research and higher education sector.

AAF connects people to online resources, which facilitate national and international collaboration. Through the Federation users can access multiple services via a simple login mechanism.

BENEFITS

- lowers costs and reduces effort with managing federated identity in individual subscriber organisations
- provides users with one login that is a fast and simple way to access the services they need online
- allows academics and researchers to easily collaborate with their colleagues in other organisations
- enables users to quickly and easily connect with a growing number of digital resources connected to the federation, including national research infrastructure
- enables service providers to quickly and easily connect their services to over one million users across the research and education sector
