

ORCID, the Open Researcher and Contributor ID is changing the way researchers connect to their works around the globe.

The ORCID Consortium is a community of Australian organisations that takes a national approach to ORCID adoption and integration. The Australian ORCID Consortium maximises benefits for member organisations and provides a national community.

VISION 2020

AUSTRALIA'S ORCID ASPIRATIONS

By 2020, all Australian researchers, regardless of institutional affiliation, will be able to easily claim and manage the data regarding their research grants, research and research-related outputs through ORCID and that their details will travel with them as they build their careers.

USER STORIES

BENEFITS FOR:

- ▶ FUNDERS

UNIVERSITIES

Australia's ORCID community is made up of universities, research organisations, national research capabilities, funders and the Consortium Lead.

The community works to advance ORCID adoption and integration on a national scale.
